G & R Own Root Roses

Mrs. Chas. Bell

THE STANDARD of excellence for forty years. To-day "The Largest Rose Growers in the World." This does not mean much to a prospective buyer unless he stops to consider that the reason for this Slogan is a continued and ever increasing demand for stock that has made good—Stock that has brought good results.

The Proof of the Pudding

One of our customers in Oregon says: "Several years ago we bought your Roses, then we made the attempt to grow them ourselves, then again we tried the California-grown Roses, but we are back with you and we are back to stay. No Roses do so well with us as the G. & R. Roses. We expect to plant more largely of your Roses each year."

This is why G. & R. Roses are finding a ready market everywhere they are tried.

To Our Patrons

A few words of greeting to our many customers.

Wish we could pay you a personal visit and thank you for your liberal patronage in the past. Future orders depend on the degree of satisfaction obtained from those received in days gone by. This season we are offering excellent values in New Roses, and never have we had such a splendid list of both new and old sorts of merit. Our old customers we greet as "Old friends." To new customers we extend this friendly greeting. Our Roses are grown under glass, on their own roots, and held at a low temperature, and can be shipped at any time to suit your planting season. Two and a quarter and four inch pot sizes. Place your order early. It assures you of first propagated stock, a wide range of varieties and no disappointments.

We handle no field or grafted Roses of any kind. We serve the trade who want the best because they wisely realize that those who make the most money in business have the reputation for high quality goods. Quality is remembered long after price is forgotten. Cheap goods are expensive. The dissatisfied customer never remembers how little was paid—only how poorly the product served its purpose. **THEY DON'T COME BACK.**

Begonia Jewel Evansiana

This is a tuberous-rooted, herbaceous, hardy perennial Begonia, losing its tops in the fall. When bedded out, the roots remain in the soil and start new growth in the spring, just as do the Peony and Perennial Phlox. The plants like a rich, porous soil and partial shade and will bloom throughout the summer. It is really one of the most beautiful of summer blooming Begonias and never fails to grow well and bloom freely when bedded out in a partially shaded, moist situation; produces clusters of flowers and buds of a beautiful pink color by the hundred on a single plant during an ordinary growing season. Think of it, a Hardy Begonia, one that stood twenty degrees below zero last winter, and came up and bloomed all summer. So many persons write us asking for plants suitable for shady places. Well, Begonia Evansiana will fill the bill. 85 cents per dozen; \$6.00 per hundred.

LIBERTY—In the past we have sent out four Ferns that have stood the test, viz., Roosevelt, Teddy Junior, Goodii or Baby's Breath, Splendida or Big Four. We now offer Liberty, feeling sure that it will become as famous as any of the quartet. Liberty has a cast of blue that submerges the green; the fronds are finely cut and the outstanding qualifications of this variety are the fact that each pinna is crested or split, giving it a decided unique appearance. We feel sure this Fern will make a place for itself. Our claims for this Fern have been verified the past fall in the great number of repeat orders sent us after seeing it. It is the biggest make of them all.

TEDDY JUNIOR (The Fern for Every Household.)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

JOHN WANAMAKER ("The Wanamaker Boston Fern")—A "sport" from Nephrolepis Scholziana, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholziana and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower; making an abundance of fronds, and is quite distinct from any other Nephrolepis.

General Collection of Plants and Vines

Fern Whitmanii Compacta

Ferns

ROOSEVELT—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

SPLENDIDA ("The Big Four Fern") (Good & Reese).—It combines the good qualities of the four most popular sorts—the grace of the "Boston", wavy effect of "Roosevelt", fluffy effect of "Ostrich Plume", and the uniqueness of the "Fish Tail".

WHITMANI (The Ostrich Plume Fern.)—The well-known fluffy leaved fern; a popular florists variety.

WHITMANII COMPACTA ("The Parlor Fern")—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

SCHOLZELLI ("The Crested Fern")—The fronds, like Scottii, stand erect, and with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; further more, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

BOSTONIENSIS ("The Boston Fern")—A variety that needs no description. Still the most popular of all varieties.

EXALTATA ("The Old Original Sword Fern.")—The parent from which all varieties offered herein originated. Of distinctive growth, having longer and narrower fronds than any of its progeny, and of very erect growth. It is greatly used as a centerpiece in vases and baskets.

GOODI ("The Baby's Breath Fern.")—(Good & Reese).—This Fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very fluffy. A well-grown specimen is in great demand. It is of easy culture.

SCOTTII ("The Newport Fern.")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. **Two and one-quarter inch pots, \$1.00 per dozen; \$7.00 per hundred; \$65.00 per thousand.**

Dwarf Ferns for Fern Dishes

We have at all times a good supply. Our production of these plants increases each year—over fifty thousand fine plants for spring shipment.

ASPIDIUM TSUSSIMENSE—The most valuable for Fern Dishes; of strong, but dwarf and graceful habit, of good color and of the best keeping qualities. A clean, good grower, and very ornamental.

CYRTOMIUM FALCATUM, or HOLLY FERN—A beautiful and rapidly growing Fern that succeeds exceedingly well, small plants making fine specimens in a short time. Fronds resemble branches of Holly, from which it takes its name.

PTERIS MAYII—A variegated variety. Low-growing and suitable for edging Fern pans or dishes.

PTERIS WILSONII—The most beautiful and useful of all the crested sorts for pans or dishes.

PTERIS WIMSETTI—A beautiful low-growing Fern, suitable for table dishes.

Hardy Vines and Climbers

Akebia Quinata

A clean rapid-growing vine with lovely foliage and graceful habit of growth, making it desirable for porch decoration and shade on houses where coarser vines could not be used to good advantage. The unique, violet-brown, ripe grape scent flowers come in clusters in the spring and are very attractive. 85 cents per dozen; \$6.00 per hundred.

Chinese Cinnamon Vine

Its rapid growth, abundant foliage and modest, sweet-scented flowers give it supremacy over all foreign and domestic climbers. 70 cents per dozen; \$5.00 per hundred; \$45.00 per thousand.

Clematis Paniculata

Japanese Virgin's Bower.

One of the most beautiful of our hardy flowering vines. The flowers are pure white, and are borne in large panicles or clusters of bloom, fairly covering the plant, so that it is a mass or sheet of fleecy-white. Price, two and one quarter inch pots, 55 cents per dozen; \$4.00 per hundred; \$35.00 per thousand. One year field grown, \$1.10 per dozen; \$8.00 per hundred; \$75.00 per thousand.

Chinese Wisteria

Desirable for porches, trellises, etc., and when in full bloom is truly magnificent. It flowers in early spring, in long, drooping racemens, resembling in size and shape a bunch of grapes. Young plants, \$1.70 per dozen; \$12.00 per hundred; \$115.00 per thousand.

Honeysuckles

Price, 75 cents per dozen; \$5.50 per hundred; \$50.00 per thousand.

AUREA RETICULATA—Golden leaved Honeysuckle.

HALL'S JAPAN—The most constant bloomer of the class, being literally covered all summer with beautiful yellow and white flowers.

SCARLET TRUMPET, or RED CORAL—The old favorite.

The Wonderful Japanese Kudzu Vine

This is the most rapid-growing vine that anyone knows of. By measurement it has been known to grow twenty feet in a week. The foliage is large and tropical. It is entirely hardy. Everyone has trouble in getting nursery grown plants of this to grow. We have prepared and offer pot-grown plants, the kind that has the crown to the plant and the ball of earth to the roots, and you try to stop them from growing and see if you don't run into a snag. Two and one quarter inch pots, 90 cents per dozen; \$6.50 per hundred; \$60.00 per thousand.

Time to Buy Peonies DURING THE FALL SEASON

The Proper Time to Plant Peonies is from September 1st Until the Ground Freezes

OVER 1000 VARIETIES TO SELECT FROM

The six points of excellence we demand in a Peony are, in their respective order, as follows: Time of blooming; sure, free bloomer; color; size and form; strong stem; fragrance.

The demand for fine Peonies is growing with each year, and every florist should have at least a small planting of them from which to supply his trade, both for the plants and for cutting the bloom. One can make no more profitable investment. The bloom if cut in the bud lasts for a week or more.

We started some twenty years ago to grow Peonies, and we believe that no firm in this country has a better list or more in number. Close to a million roots, occupying eighty acres of land, many of them being two and three-year-old plants.

Our endeavor is always to lead and not follow in any branch of the floral business we undertake. We will make Good & Reese Peonies as much as a household word as are G. & R. Roses, so do not forget us when in need of Peonies.

“PEONIES FOR PROFIT”

Plant Peonies and Make Money

We are selling Peony roots to many persons who are planting them for cut flowers in acre, four-acre and as high as ten-acre plantings. You had better investigate this phase of the Peony question.

If you wish to grow Peonies for cut flower planting: Plant 3 feet apart in rows, set rows 4 feet apart. It requires 3,630 plants to the acre for this distance planting.

WE ARE MEMBERS OF THE AMERICAN PEONY SOCIETY.

You can select your Peonies now if you wish, but we could not ship them before September 25th.

Hardy Lilies

LILY CANDIDUM (Madonna Lily)—Have a nice lot of French grown bulbs. This is the one hardy Lily that does well year after year in the open ground. **20 to 22 centimeters at \$15.00 per hundred.**

Lilium Giganteum

The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open or partially open they can be kept for two weeks. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals. As a garden Lily it is of great beauty, being entirely hardy except in Northern climates, where it requires a protection of leaves or litter to the depth of five or six inches. **\$1.75 per dozen.**

Lily Tigrinum Flo. Plena.

Lancifolium Album

One of the most beautiful of all lilies. Pure white and very fragrant. **\$2.40 per dozen.**

Vigorous constitution, medium in height, bearing one to several handsome, white, fragrant flowers; slightly shaded pink outside and the lower inner surface primrose yellow. It is a Hardy Lily and considered one of the finest novelties offered in many years. It seems to thrive in any good soil not too wet. Every one who sees a L. Regal bed in bloom admires it. **Blooming bulbs, \$20.00 per hundred.**

The old fashioned single Tiger Lily. Too well known to need a description. Orange yellow, brown spots. **Strong bulbs, \$2.00 per dozen; \$15.00 per hundred.**
